

ICT VISION STATEMENT

“Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important”.

Bill Gates

In learning, it is our intention to give all pupils the skills to prepare them for their future. ICT is an essential part of everyday life and will continue to evolve in as yet unforeseen ways, so our children will need confidence and ability to move with the changes as they arrive in order to prepare the children for their future.

Through teaching ICT, we encourage their curiosity in a safe environment, teaching them to find, analyse, explore, exchange and present information. We help to develop the necessary skills for using information thus enabling their curiosity and encouraging them to be creative, confident and independent learners.
